MR

MEMORANDUM FOR: Mr. Paul O'Connell
Senate Select Committee on Ethics Subcommittee

FROM:
Assistant Legislative Counsel

SUBJECT: Your Memorandum Dated 29 September 1978

1. Attached for your information is a copy of the 25 December 1977 New York Times article containing an indication of the information in the article which the Agency considers to have been classified at the time the article was published.

2. To confirm our recent phone conversations, a former Agency officer who participated in discussions with Messrs. Levinson and Nordlicht in March, May and June of 1977 does recall that the figure of 10 million barrels per day was mentioned in connection with the Agency's explanation of its monthly average export figures and the day-to-day fluctuations within those figures. There is, however, no written record of this specific point having been discussed.
